

PROJECT 01

BEIT LEHI VISITOR CENTER

ARC 3110 | Fall Semester 2021

PHASE 3 – DESIGN DEVELOPMENT

Watercolor building section showing site context (Drawing by Michael G. Imber Architects)

DESIGN DEVELOPMENT

With the knowledge gained from the Schematic Design phase, students will begin refining their design proposals. These refinements should continue to address the project's program, client requirements, and user needs. As outlined in the course schedule, design development includes the following activities:

- Begin Revisions from Review - Plan, Section, Elevation
- Begin Final Drawings, Perspectives
- Layout Details at Large Scale
- Review Analytique Layout Options
- Draft Analytique and start pen overlay
- Shade and Shadow Casting
- Watercolor Rendering
- Preparation for Final Review - Finalize Boards
- Hand in Project / Pin Up Materials for Review
- Final Design Review with Professional Jury
- Digital Portfolio Due

ANALYTIQUE

“To design is to compose, but to compose one must have objects with which to compose; for the architect these are the ‘elements of architecture,’” wrote John Harbeson. Embedded in the *Ecole des Beaux-Arts* curriculum (which descended from the Academie royale d’Architecture in 1671 during the reign of Louis XIV) was *analytique rendu* (analytical rendering). An analytique was defined as a codified design problem that dealt with the elements of architectural design. It consisted of a single page composition of items such as a floor plan, elevation, detail, ornament, perspective, etc.

The purpose of the analytique drawing was to demonstrate that a student had gained both an understanding and developed their skills in the following areas:

- Sensibility to proportion
- Feeling for composition
- Character in drawing
- Appreciation of ornament
- Knowledge of descriptive geometry in projections and in shades and shadows

In order to create the final watercolor analytique, each student will follow three simple steps.

STEP 1 - Create Thumbnail Concepts for Analytique Composition

Each student should compose four (4) thumbnail concepts for their analytique composition. Each thumbnail can be created on trace paper or in your sketchbook and will be a minimum of 3"x5" in size. Each composition can have an arrangement of the following items: floor plan, elevation, site plan, building section, wall section, bay elevation, column order, ornament details, etc. **Please bring your concepts into class to review with the instructor for final approval to move onto step 2.**

STEP 2 - Draw your Analytique Composition in Pencil/Pen

In the next step you will draw the composition of your choice, after reviewing them with the instructor, in pencil / pen. This composition will be part of your final drawing and will be drawn on a large format sheet of watercolor paper (24"x36" min). The orientation of your drawing (landscape or portrait) will be determined based on your composition.

STEP 3 - Apply color, shade, and shadow to the Final Analytique Rendering

In the final step, you will apply color, shade, and shadow to the elements in your drawing with watercolor techniques to demonstrate materiality, depth, and character for your project.

DD FINAL REVIEW DELIVERABLES

For the Design Development Final Review, each student will work on developing their projects by producing the following drawings. These will be assembled on several 24"x36" drawing sheets.

- Site plan showing roof plan and context around site, such as roads, bus/vehicle parking, bus loading/unloading, tour loading/unloading, trees, green space, sidewalks (1"=20')
- Main building elevation and side elevations, include shadows as well as people and trees for scale (1/8"=1'-0")
- Floor plan with spaces labeled (1/8"=1'-0")
- Longitudinal and cross sections of building showing context, include people and vegetation for scale (1/8"=1'-0")
- Diagrams showing program organization and circulation
- Large exterior perspective (+/- 12"x24")
- Large interior perspective conveying user experience (+/- 12"x24")
- Watercolor analytique containing a series of elements from the project in a composition (e.g., main elevation, floor plan, enlarged details of classical order, ornament, wall section, bay elevation, etc.)

Each drawing should include a titleblock and the following:

- North arrow (when appropriate)
- Graphic scale
- Drawing type label (Ground floor plan, East elevation, section)

DD PHASE ASSESSMENT

Your design project will be graded based on the following criteria:

LEARNING OBJECTIVE	POINTS
DESIGN SOLUTION: Successful design solution to fundamental architectural problems that integrates concepts, formal/visual principles, creative inquiry, and techniques that address the functional and programmatic requirements of the project.	40 (20%)
FORMAL & SPATIAL PRINCIPLES: Demonstrates fundamental understanding and application of formal, spatial, and aesthetic principles. (e.g., proportion, classical orders, geometry, user experience, human scale, beauty, hierarchy)	20 (10%)
ANALYTIQUE: Successful watercolor analytique rendering demonstrating a knowledge and application of graphic composition, classical ordering systems, ornament, shade/shadow, materiality, and parti.	40 (20%)
SITE DESIGN: Project addresses the immediate site, neighborhood, and urban design needs of the area. Design proposal appropriately responds to issues emerging from the historic district, immediate context, socio-cultural demographic, and institutional presence.	10 (5%)
VISUAL/GRAFIC COMMUNICATION: Communicates design solutions effectively using architectural presentation materials and techniques (e.g., line weights, level of detail for scale, level of craft, organized graphic	10 (5%)

presentation). This also includes analog models and their ability to adequately convey the main project characteristics.	
USE OF PRECEDENTS: Project clearly makes informed and well-reasoned choices regarding the incorporation of design principles from precedent analysis.	10 (5%)
DESIGN PROCESS: Project demonstrates a rigorous and successful design process. This will be evident in the refinement of the selected concept sketch (<i>esquisse</i>) to the final design solution (e.g., development of plans, sections, elevations, models, diagrams, perspectives, etc.)	10 (5%)
VERBAL COMMUNICATION: Verbal communication is well planned and executed. Presentation results in further discussion of the design solution.	10 (5%)
INTERIOR DESIGN: Project successfully demonstrates a fundamental understanding and application of formal, spatial, and aesthetic principles for a major interior space. (e.g., proportion, classical orders, geometry, user experience, human scale, beauty, hierarchy)	20 (10%)
MOTIFS / ORNAMENT: Project successfully demonstrates the incorporation of motifs and architectural ornament for a significant element of the building which reinforces the purpose and symbolism of the client and program.	20 (10%)
PROJECT REQUIREMENTS: All project requirements and criteria are met, such as deadlines, deliverables, format, portfolio, etc.	10 (5%)
TOTAL	200 points / 100%
